

Sustainable Transport Policy

Dream Nepal Travel & Tours

Dream Nepal is a socially aware travel company, which endows with as much dedication to the society as it does to its true service. We promote responsible travel to natural areas that conserves the environment and improves the well being of local people.

TRANSPORT SELECTION

In selecting transport options, the transport companies must comply with the following requirements:

- Providing a 'green' service, by selecting the most sustainable option of transport, considering price and comfort
- All vehicles should comply with the rules and regulations imposed by the government of Nepal
- Drivers are well informed on health and safety regulations and traffic rules, and have sufficient driving and communication skills.

Dream Nepal will provide training and guidance on sustainability issues and sustainable driving techniques where needed. We will provide the drivers with the following Code of Conduct for Drivers:

- Switch to a higher gear quickly (when you drive 80 km/h, you should drive in 5th gear | when driving 50 km/h, in 4th gear)
- Drive as much as possible at a uniform speed at a high gear. This decreases fuel consumption considerably.
- Look as far ahead as possible and anticipate what other traffic is going to do. Avoid unnecessary braking and fast acceleration.
- When you know you will have to stop soon, release the gas, and roll out in free gear.
- Switch off the engine when you have to wait. (Already for a stop of 20 seconds, it makes sense to switch off the engine.)
- Turn on the engine just before leaving only.
- If you want to cool the vehicle for the passengers, turn on the engine only five minutes before the guests arrive.
- When guests are on an excursion, switch off air conditioning and engine. Let the tour guide call you when they are about to return, and turn back on the engine only five minutes before the guests arrive.
